

HARDWARE SOLUTIONS FOR YOUR OBSOLETE DETECTORS

- RADIATION MEASUREMENT SYSTEMS
- PROCESS CONTROL INSTRUMENTATION
- REPAIR, REFURBISH, and REPLACEMENT
- OBSOLETE or DISCONTINUED DETECTORS

Technical Associates specializes in the design and manufacture of replacement solutions for radiation detectors for both analog and digital systems. You can count on us for quality, reliability and attention to detail.

Keep older instrumentation operating at peak performance with our hardware support.

SYNOPSIS:

Technical Associates has served the Nuclear Industry since 1946 and the Nuclear Power Plant Industry and the Nuclear Navy since 1955 by providing safety related radiation detectors.

In 1995 we began addressing the equipment obsolescence issue and have become specialists in re-engineering and replacing obsolete detectors with units that fit in the same location and perform the same functionality while improving their reliability.

Technical Associates also refurbishes original manufacturers detectors to a nearly new condition for reinstallation into the power plant.

Please contact us for more information on how we can help with your power-generation needs.
